

PRODUCT DATA SHEET

XTREMESTRIP™

DESCRIPTION

XTREMESTRIP™ is a fast acting remover of varnish paint, enamels, lacquer, shellac, glue and mastic. XTREMESTRIP™ is a very fluid – “water like” – stripper that makes an excellent dip tank stripper. It is formulated to be applied on flat surfaces – like floors. XTREMESTRIP™ will not raise the grain or discolor the finest woods. After stripping the coating on the substrate, it is not necessary to neutralize the surface with water before coating the stripped surface.

APPROVED SURFACES

XTREMESTRIP™ removes paints and other coatings from the following surfaces:

- **Metal**
- **Wood**
- **Concrete**

CAUTION: XTREMESTRIP™ SOFTENS LINOLEUM ASPHALT, RUBBER TILE, VINYL, PLASTICS AND FIBERGLASS.

DIRECTIONS FOR USE

- **USE PROTECTION: CHEMICALLY RESISTANT GLOVES, RESPIRATOR, EYE PROTECTION. KEEP OUT OF REACH OF CHILDREN.**
- Apply a generous amount of **XTREMESTRIP™** - brush, roller or spray gun. Parts may be dipped in a tank for cleaning. If a brush is used, brush in a full consistent layer; do not brush back and forth.
- Leave the area and let the stripper do the work. After 15 minutes, test-scrape a small area to see if finish is ready for removal. Remove loosened finish by scrapping with a metal scraper, putty knife or brush. If you are stripping wood be sure to scrape gently in the direction of the wood grain with a plastic stripping tool. A toothbrush, toothpick, or stripping brush will help remove old finish buried in recesses. Multiple coats or stubborn finishes may require repeat applications. Use a clean abrasive pad dipped in Mineral Spirits to loosen remaining finish and remove any residue.
- Before refinishing wood, allow the surface to dry thoroughly. Sand lightly in the direction of the grain and then apply new finish. It is not necessary to neutralize the surface before painting.
- Storage and Disposal: Store in a cool place. Once opened, use within 6 months. When disposing of the product allow liquids to evaporate and residue to dry outdoors then dispose of according to law.
- **DIP-TANK APPLICATIONS:**
Protect your hands with polyethylene or neoprene gloves. Open the container slowly to relieve any pressure. Pour the **XTREMESTRIP™** into an open container. The container should be large enough to fully submerge the parts being stripped. Be sure to use metal tools to dip the parts in the tank to avoid contact with the skin. Leave the parts submerged in the stripper for 10 -15 minutes and then remove. The finish should be removed using steel wool and/or a brush and water. If the finish is not entirely stripped from the part then repeat the process until the part is thoroughly stripped. To Refinish: wash with water and allow to thoroughly dry. Prepare the area that will be refinished according to the manufacturer’s instructions.

PRODUCT DATA SHEET

FIRST AID

- **DO NOT BREATHE VAPORS AT HIGH CONCENTRATIONS – USE IN WELL VENTILATED AREAS.** If you are feeling dizzy or drowsy, move to open air away from fumes. Seek medical attention.
- If swallowed, seek immediate medical attention.
- In the event of eye contact flush for a minimum of 15 minutes and seek medical attention.
- In the event of skin contact, remove contaminated clothing and wash skin with soap and water. If irritation develops and persists, seek medical attention.
- **KEEP OUT OF REACH OF CHILDREN**

PROPOSITION 65 WARNING: THIS PRODUCT CONTAINS CHEMICALS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER, BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM. XTREMESTRIP™ cannot be made non-poisonous. The risk to health depends on the level and duration of exposure. Reports have associated repeated and prolonged overexposure to solvents in this product with neurological and other physiological damage. Intentional misuse of this product by deliberately concentrating and inhaling vapors can be harmful or fatal. DO NOT USE WITHOUT READING THE SAFETY DATA SHEET (SDS) – AVAILABLE ON OUR WEBSITE.
